

Renovation Under \$5 million-Honorable Mention Pinnacle Peak Country Club

It's a question faced by many owners: Demolish or redesign. Fortunately, the owners chose to preserve the spirit of 1976 building while incorporating new systems and elegant design updates. Dining areas were improved for better patron and service flow and poor acoustics, along with an out dated style.

The design team looked for the "original Arizona" clubhouse beneath a series of generic remodels. Designers stripped away the remodels to reveal the "bones" of the original building.

The result is a warm, casual and inviting atmosphere for members to meet, relax or play a round of golf. <<
